SaaS Leaders CampusDocs and TopSchool Partner

Partnership provides campuses looking for more flexible, cost effective IT solutions a better alternative

HONOLULU, HAWAII - (January 22, 2010) CampusDocs, Inc., a leader in SaaS (Software as a Service) based Document Lifecycle Management (DLM) solutions, today announced that it has partnered with TopSchool, a leader in Student Lifecycle Management (SLM) solutions. The two companies have signed a partnership agreement and have initiated work to more tightly integrate their DLM and SLM solutions together.

Both CampusDocs and TopSchool utilize a Software as a Service delivery model that dramatically reduces a client's upfront investment and removes the headaches and cost of updating and managing complex IT solutions. The SaaS delivery model frees up valuable financial and human resources by eliminating the need to install, configure, maintain, update and support yet another information system and instead focus their resources on meeting the evolving challenges of the higher education marketplace.

CampusDocs DLM solution provides a complete document imaging and management solution that helps educational institutions organize and manage the large volumes of paper and data that fill their offices. CampusDocs solution works with all the major scan equipment and multifunction device vendors on the market today and is designed to easily integrate with a broad range of third party solutions and data sources.

TopSchool's SLM solution goes beyond the capabilities of a traditional SIS by providing a portal for prospective students, a customer relationship management (CRM) system to manage prospects through admission, a student information system (SIS) to track and manage the institution's students from enrollment through program completion, and finally an intelligent reporting suite to measure outcomes and improve school offerings.

"In these challenging economic times, we believe that the demand for cost-effective delivery models like SaaS, over traditional software purchases will continue to grow" said Kevin Awaya, President, CampusDocs. "TopSchool and CampusDocs share a common philosophy that schools can get the solutions and services they need without having to make large upfront investments in software and equipment. We are excited about the partnership with TopSchool and look forward to working together."

"Campusdocs fit TopSchool nicely both from a business and technology perspective" said Matthew Schnittman, President and CEO of TopSchool. "TopSchool was built around a vision of an open technology architecture, allowing our customers to take advantage of best-of-breed solutions in the market and this partnership brings another part of that vision into greater focus."
