

CampusDocs Partners with eCopy

Users can connect scanners and MFPs directly to CampusDocs hosted solution

HONOLULU, HAWAII - (April 13, 2009) CampusDocs, Inc., a leading provider of hosted document management solutions, today announced that it has partnered with eCopy™, Inc., the leading provider of solutions that integrate paper documents into business software applications. The partnership will enable CampusDocs users to connect directly to a broad range of scanners and multifunction peripherals (MFPs) for more streamlined and efficient document management.

The CampusDocs browser-based software platform significantly reduces the time and expense of dealing with massive volumes of paper documents associated with admissions, registration, financial aid, and student records. Colleges and universities pay an all-inclusive low monthly fee to access the software, and avoid expensive equipment purchases and installation costs of an on premise solution.

"Campus Docs customers can now further leverage their existing technology investments thanks to eCopy's capabilities," said Kevin Awaya, President, CampusDocs. "This value add is in keeping with the CampusDocs commitment to superior return on investment, and this partnership is yet another example of our strategy to respect our customer's bottom line in everything we do."

With eCopy's document imaging software platform, CampusDocs users can connect to all the major brands of scanners and copiers to scan, index and release imaged documents and files directly into a CampusDocs online repository. Existing eCopy users will have the option of implementing CampusDocs to release information into a web-based hosted solution that provides secure access to documents and files from any location via the Web.

"CampusDocs' focus on the higher education marketplace enables eCopy to expand our footprint in an important vertical market," said Bill Brikiatis, Director, Corporate Marketing, eCopy. "eCopy's document imaging software platform combined with CampusDocs' hosted document management platform provides colleges and universities tremendous value by helping them improve efficiency and streamline campus workflows.

About CampusDocs, Inc.

Headquartered in Honolulu, Hawaii, CampusDocs offers higher education institutions a web-based, fully-hosted document management service designed specifically to meet their needs. CampusDocs' complete feature set and its unique pricing model provides a cost effective alternative to in-house, resource intensive software solutions. CampusDocs provides its service on an enterprise-class infrastructure with multiple data centers spread across the continental US. Backed by an experienced professional services team, CampusDocs enables educational institutions to automate the routing, review and archival of imaged documents.
